

## **FILE OF LIFE PROGRAM**

Delta County Ambulance District is offering free File of Life Kits to the citizens of Delta County. The File of Life Kit is a magnetic sleeve that attaches to the refrigerator. Inside the plastic sleeve is a form to list your prescription medications, medical information, and emergency contacts. In an emergency, time is crucial. The File of Life Kit is a nationally recognized program that enables Emergency Responders to quickly locate information regarding your medical history. When dispatched to your home Emergency Medical Technicians, Paramedics, Firefighters, and Police are trained to go to your refrigerator to obtain medical information from the File of Life form.

Please download the File of Life form or call Delta County Ambulance District office at 874-7001 to pick one up
